# Our work

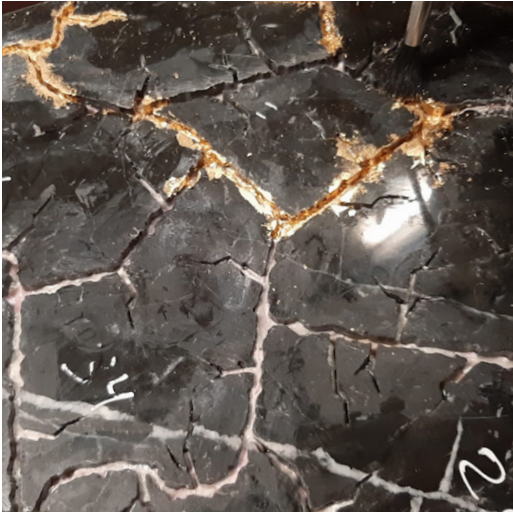

Our workshop is offering you some captivating items of our own design.

We never mass produce tables. Every table of ours is unique. They're all handmade. So we approach each item individually giving it our special attention. We've been working with marble for decades and have an arsenal of techniques at our disposal to unveil the natural beauty of stone.

Why has marble been trendy at all times? Well, since antiquity, it has proven itself to be durable, practical, environmentally safe and always unique in its beauty. Tables made of this natural material are always the best and most advantageous solution, compared to all other known materials, when it comes to practicality and aesthetics of both the interior and the exterior.

But oftentimes, it might be challenging to find a table on sale that would perfectly meet your needs and suit your home. Suppose, you have finally found just what you've been looking for - or so it seems. After giving it a second glance you're not completely satisfied: maybe you want it to be a bit taller or lower or its size doesn't seem to be very comfortable. Or maybe its color or style doesn't exactly match your overall interior. Or you want a stone processed with a different technique. Thus, you end up with quite a list of things you feel need to be changed.

But these very features make up the satisfaction with the item you buy. They reflect your idea of comfort at your home.

Keeping these principles in mind, our aim is to craft tables according to your order. We want to take into account the many details that reflect your personal preferences and needs.

There are two ways this aim can be reached: You can bring your own project and we will make a table according to it. Or we can design a project for you according to your style concept. We produce tables of various styles. We will be very glad to consider your propositions.

With kindest regards,

***Mesas & Mármore***

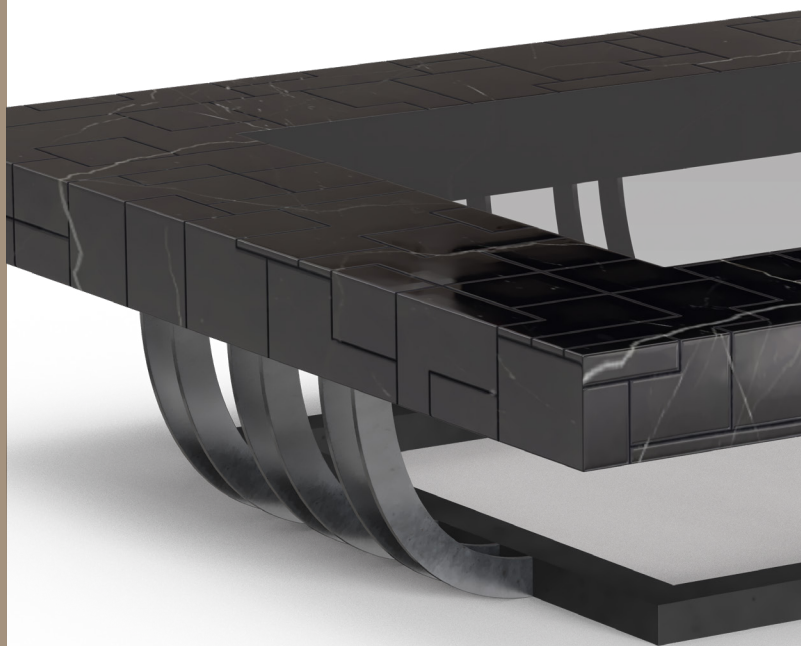

Desert Table

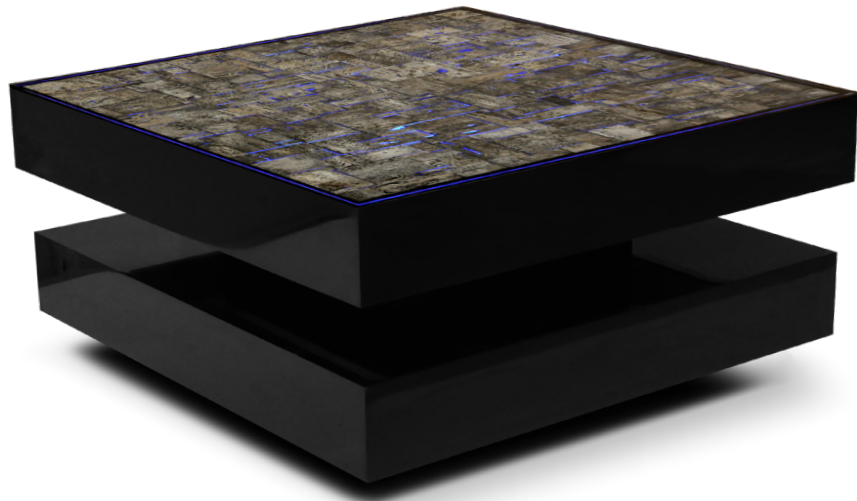

# Interior
